

I began attending Hancock County board meetings because the Emergency Medical Services (EMS) situation in Hancock County was in really bad shape and I was hearing conflicting stories about what our county board was saying and doing about it. As a National Registered EMT-B, EMS issues are important to me. Attending Hancock County Board meetings was a very eye opening experience. For one I found out that the Hancock County Board really does care about emergency services in Hancock County. I also became friends with Randy White, and began my personal journey in a relationship with Jesus Christ.

When I first meet Hancock County Board member Randy White, we were at the very opposite sides of Emergency Medical Services issues. What I have found is a man of integrity, a man willing to listen to all sides of an issue, and a man willing to do what it takes to do the right thing for the citizens of Hancock County.

Randy has a deep love for God, his family and his fellow man. Whether he is attending a county board meeting, helping at a disaster drill, assisting in getting better cell phone coverage for an area, or counseling a friend, his love and determination shines through.

When I first meet Randy White my first impression was is this man for real. But in watching and seeing first hand of what he does, he is very real. We need someone with Randy's beliefs and integrity in our state government.

Sincerely,

Kathryn A. Sparrow
